the dissolution of the communist system led to the creation of new states and the formation of new concepts of citizenship in the post soviet states of central and eastern europe the formation of national identity also occurred in the context of the process of increasing economic and political globalisation particularly the widening of the european union to include the central european post socialist and baltic states internationally russia sought to establish a new identity either as a european or as a eurasian society and had to accommodate the interests of a wider russian diaspora in the near abroad this book addresses how domestic elites regional political and economic influenced the formation of national identities and the ways in which citizenship has been defined a second component considers the external dimensions the ways in which foreign elites influenced either directly or indirectly the concept of identity and the interaction with internal elites the essays consider

the role of the european union in attempting to form a european identity moreover the growing internationalisation of economies privatisation monetary harmonisation dependence on trade also had effects on the kind of national identity sought by the new nation states as well as the defining by them of the other the collection focuses on the interrelations between social identity state and citizenship formation and the role of elites in defining the content of concepts in different post communist societies this book was originally published as a special issue of europe asia studies

a fascinating account of one of america s most important industries and its dangers throughout the early twentieth century railroad safety steadily improved across the united states but by the 1960s american railroads had fallen apart the result of a regulatory straightjacket that eroded profitability and undermined safety collisions derailments worker fatalities and grade crossing mishaps skyrocketed while hazmat disasters exploded into newspaper headlines in back on track his sequel to death rode the rails mark aldrich traces the history of railroad accidents beginning in 1965 when congress responded to bankrupt and scandal ridden carriers by enacting a new safety regime aldrich details the federalization of rail safety and the implementation of a massive grade crossing program he touches on post 1976 economic deregulation which provided critical financing that underwrote better public safety he also explores how the national transportation safety board acted as a public scold to shine bright lights on private failings while federal railroad administration regulations reinforced market incentives for better safety ultimately aldrich concludes the past 50 years have seen great strides in restoring railroad safety while enhancing industry profitability arguing that it was not inadequate safety regulation but rather stifling economic regulation that initially caused an uptick in train accidents back on track is both a paen to the return of more competitive railroading and the only comprehensive history of the safety of modern american railroads praise for death rode the rails a masterful study of the complex evolution of railroad safety american historical review students of rail safety and today s class i railroad managers need to read this volume trains aldrich has created a masterpiece his research is extensive drawing on a rich variety of obscure yet relevant sources register of the kentucky historical society one of the first large scale scholarly studies of railroad safety in america railroad history a thought provoking and well grounded contribution to the history of american economic development journal of american history pioneering a central message of aldrich s book is that little accidents played a crucial though until now largely hidden role in the gradual evolution of a risk society technology and culture a work of merit essential reading for historians of transport safety business and technology journal of transport history impressive and thoroughly researched demonstrates how railroad safety evolved from the intersection of market pressures technology and public sentiment journal of southern history

winner of the homer d babbidge jr 2016 in wesleyan university 1910 1970 david b potts presents an engaging story that includes a measured departure from denominational identity an enterprising acquisition of fabulous wealth and a burst of enthusiastic aspirations that initiated an

era of financial stress threaded through these episodes is a commitment to social service that is rooted in methodism and clothed in more humanistic garb after world war ii potts gives an unprecedented level of attention to the board of trustees and finances these closely related components are now clearly introduced as major shaping forces in the development of american higher education extensive examination is also given to student and faculty roles in building and altering institutional identity threaded throughout these probes within in the analytical narrative is a close look at the waxing and waning of presidential leadership all these developments as is particularly evident in the areas of student demography and faculty compensation travel on a pathway through middle class america within this broad context wesleyan becomes a window on how the nation s liberal arts colleges survived and thrived during the last century this book concludes the author s analysis of changes in institutional identities that shaped the narrative for his widely praised first volume wesleyan university 1831 1910 collegiate enterprise in new england his current fully evidenced sequel supplies helpful insights and reference points as we encounter the present fiscal strain in higher education and the related debates on institutional mission

between the late nineteenth century and the outbreak of the second world war astronomy underwent a radical change from a science centred on the positional measurement of stars to the study of astrophysics and the universe this book tells the story of the royal observatory at greenwich from 1881 to 1939 charting a hitherto under researched period of its history and bringing its management to life using a wealth of primary source research in the royal observatory s archives and elsewhere lee t macdonald describes and analyses how the observatory originally founded in 1675 to tackle the problem of finding longitude at sea branched out into areas at the cutting edge of astronomical research including photographic mapping of the sky and the study of solar eclipses he shows how the observatory remained committed to the traditional missions in navigational and positional astronomy and how its work became increasingly challenged by the growth of london culminating in relocation the story is a valuable exemplar of how a working observatory gradually transformed into a heritage institution which thrives to this day the royal observatory greenwich 1881 1939 will be essential reading for astronomers and historians of science and important for heritage professionals particularly those working in historic scientific institutions

marching to the beat of punk rock and reggae rock against racism was a mass movement built in opposition to racism and fascism in 1970s Britain at a time of severe economic and social crises. Rar, alongside the anti-Nazi League, organised one of the biggest and most effective political and cultural mobilisations of the post-war period, expressing itself through spectacular carnivals, concerts, marches, and innovative forms of design and communication. Rar combined hard-headed political organisation with the optimism and energy of radical youth culture. Drawing on interviews with activists, supporters, and critics, and based on the latest research, *Crisis Music* explores the nature of this ground-breaking politico-cultural phenomenon. The author explains why Rar seized upon the power and passion of punk and reggae, and how this has helped to shape the boundaries of modern popular music. He also offers, for the first time, a clear picture of the relationship between Rar and its main political sponsor, the Socialist Workers' Party. *Crisis Music* discusses Rar's place within the left's often-troubled encounters with popular culture, and draws comparisons with other music-based movements and campaigns, such as the post-war folk revival and Live 8. This book casts light on numerous current debates about celebrity politics and the role of musicians as political spokespeople, for instance, and the links between ethnicity, popular culture, and politics. It will be of value to students and researchers in cultural studies, politics, and labor history, and to anyone interested in the role of culture in political activity.
