includes the papers and proceedings of the annual meeting

this is a volume of readings for graduate students especially those taking courses in applied econometrics who need to learn how to evaluate the validity of present theories and techniques the aim of the text is to aid readers in the difficult task of actually constructing models the essays vary in the degree of technical sophistication used but each paper intends to provide students with a sound knowledge of the practical difficulties of model specification evaluation and interpretation as well as advice on tackling these difficulties

vols for 1980 issued in three parts series authors and titles

economic theory econometrics and mathematical economics second edition forecasting economic time series presents the developments in time series analysis and forecasting theory and practice this book discusses the application of time series procedures in mainstream economic theory and econometric model building organized into 10 chapters this edition begins with

an overview of the problem of dealing with time series possessing a deterministic seasonal component this text then provides a description of time series in terms of models known as the time domain approach other chapters consider an alternative approach known as spectral or frequency domain analysis that often provides useful insights into the properties of a series this book discusses as well a unified approach to the fitting of linear models to a given time series the final chapter deals with the main advantage of having a gaussian series wherein the optimal single series least squares forecast will be a linear forecast this book is a valuable resource for economists

the purpose of the review is to promote the collection criticism and interpretation of economic statistics with a view to making them more accurate and valuable than they are at present for business and scientific purposes
