seminar paper from the year 2018 in the subject business economics information management grade 1 7 university of m□nster information systems and information management language english abstract digitalization transforms organizations professions politics education and even the cultural sector for instance the music industry where this study belongs to digital disruption collaboration and change have affected the music distribution process but how exactly and did it influence the balance of power among the actors involved the study uses actor network theory to represent the distribution networks of two artists before and after the start of the digital age michael jackson as the most successful artist of the 80s and macklemore as the first artist being no 1 without label backing the tracing of their socio technical networks shows that labels controlled the distribution channels in the past but digitalization has shifted some power from the label to the artist it enabled him to handle the

distribution process largely on his own due to streaming services distributing music is way more efficient nowadays and artists can reach a huge community of streaming users social media enables collaboration and new partnerships in the music industry which are not restricted to an artist s familiar environment additionally it is a platform for viral marketing enabling a closer relationship between artists and their fans overall digitalization has broken up the enduring domination of the major labels and empowered artists to become successful without the backing of them
