the eighteenth century looms large in the Scottish imagination it is a century that saw the doubling of the population rapid urbanisation industrial growth the political union of 1707 the Jacobite rebellions and the enlightenment events that were intrinsic to the creation of the modern nation and to putting Scotland on the international map the impact of the era on modern Scotland can be seen in the numerous buildings named after the luminaries of the period Adam Smith David Hume William Robertson the endorsement of Robert Burns as the national poet hero the preservation of the Culloden battlefield as a tourist attraction and the physical geographies of its major towns yet while it is a century that remains central to modern constructions of national identity it is a period associated with men until recently the history of women in eighteenth century Scotland with perhaps the honourable exception of Flora McDonald remained unwritten over the last decade however research on women and gender in Scotland has flourished and we have an increasingly full picture of women's lives at all social levels across the century as a result this is an appropriate moment to reflect on what we know about Scottish women during the eighteenth century to ask how their history affects the traditional narratives of the period and to reflect on the implications for a national history of Scotland and Scottish identity divided into three sections covering women's intimate intellectual and public lives this

This companion contains 31 essays by leading international scholars to provide an overview of the key debates on eighteenth-century Europe. Jeremy Black sets the politics of eighteenth-century Britain into the fascinating context of social, economic, cultural, religious, and scientific developments. The second edition of this successful text by a leading authority in the field has now been updated and expanded to incorporate the latest research and scholarship.

This book focuses on the complex ways in which architectural practice, theory, patronage, and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution. Presenting a fresh theoretical orientation and a large body of new primary research, this book offers a new cultural history of virtually all the major monuments of eighteenth-century Parisian architecture, with detailed analyses of the public debates that erupted around such Parisian monuments as the East Facade of the Louvre, the Place Louis XV, the Place de la Concorde, and the Church of Sainte Genevieve. The Pantheon depicts the passage of architecture into a mediatized public culture as a turning point and interrogates it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period. This study will interest readers well beyond the discipline of architectural history.
