presents the successes and failures of the pioneers who used object-oriented methods and languages in commercial applications.

SAP AG bought Business Objects SA in 2008. The acquisition is designed to accelerate SAP's growth with the addition of thousands of new customers and a new product line to address the fast-growing market for business intelligence (BI) software. As SAP had its own BI product, NetWeaver BI, the move has been a clear reaction to Oracle buying Business Objects competitor Hyperion in 2007. Hyperion is specialized in adding financial and performance management tools for SAP systems. The two platforms will be run as independent, standalone platforms with integration capabilities. SAP will continue to offer Business Objects software as a standalone product line, and Business Objects will operate independently inside of SAP. This business intelligence solution will be available in a more integrated fashion for the SAP customer and in a stand-alone manner for the non-SAP customer. John Schwarz, Business Objects CEO.
